TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, HTML, CSS

Mobile & Frontend: React Native, React.js, Redux/Redux Toolkit, Tailwind CSS

Backend: Node.js, Express.js

Tools: Git, GitHub, n8n

Databases: MySQL, MongoDB

Coursework: OOPs, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Junior Software Engineer Trainee

October 2025 - Present

Virim Infotech Private Limited

Onsite - Indore

- Developed and delivered a cross-platform healthcare mobile application using React Native and TypeScript, building reusable hook-based components to display health reports, records, and related data with a responsive, user-friendly interface.
- Built a companion web-based healthcare platform using React.js that mirrors the mobile app's functionality, ensuring seamless access to health reports and patient data across devices.
- Built an n8n-based AI hiring automation pipeline that parses resumes, scores candidates against a job description via LLM, and generates ranked shortlists, cutting manual screening time by 70%.

PROJECTS

Mock Ninja: AI-Powered Interview Simulation Platform — [Preview](#)

- Built a full-stack AI-powered mock interview platform using the MERN stack with real-time interview simulation, answer analysis, and candidate performance tracking through facial gesture and eye-contact analysis.
- Integrated the Google Gemini API for dynamic question generation and personalized feedback, along with face-api.js for behavioral analysis through facial gestures and eye-contact tracking.
- Improved application performance by reducing load times by 20% through API optimization, lazy loading, and frontend optimizations.

Eduved: Academic Resource Platform — [Preview](#)

- Designed and developed a full-stack academic platform enabling students to upload, browse, and download notes, papers, and study resources organized by subject and semester.
- Implemented structured content categorization and search functionality, improving resource discoverability and navigation efficiency.
- Implemented robust state management with Redux Toolkit and optimized frontend performance with lazy loading and API caching, ensuring smooth UX and reduced load times.

CERTIFICATIONS

- NPTEL Certification in Database Management System
- NPTEL Certification in Data Structures and Algorithms using Java (Score – 71%)
- Advanced MERN Development (Infosys Springboard) – Full-stack MERN application development
